

SALES:

- RPM Block Machines work closely with leading mobile block-making and materials-handling equipment manufacturers, and can assist and advise with the purchase of new machinery and mould boxes.
- We also provide re-conditioned block-making and strapping machines.
- We carefully select and refurbish these machines ourselves to ensure they will provide you with years of good service.
- All refurbished machines are thoroughly and extensively tested before despatch.
- We can deliver and commission your machine, in the U.K. or Ireland.

SERVICE:

With one of the most experienced Field Service Engineers in the block-making industry, RPM Block Machine's are experts on mobile machines used in the U.K., Ireland and in the worldwide export market.

Decades of industry experience mean you can rely on us to:

- Provide full technical backup and support.
- Trouble-shoot problems quickly and effectively, on-site or remotely.
- The RPM service van covers Ireland, North and South, and Great Britain providing:
 - Service - Breakdown cover - Operator training

F44 commissioning, Yorkshire.

F44 refurbishment, on-site in Portadown.

Machine Refurbishment:

- RPM Block Machines provide a refurbishment service for block-making and strapping machines, on-site and workshop based.
- Vibrator element refurbishment service is available on an exchange basis. We use only genuine bearings and internal parts – all vibrators are tested before return to the customer.

BSM412 strapper on-site service, Belfast.

Planned maintenance programs & Service Contracts:

- Why not talk to us about an RPM planned maintenance program?
- Our service inspection and checking processes can help prevent breakdowns and reduce your costs and down-time.

SPARES:

You can rely on RPM Block Machines to:

- **Stock and supply the parts you need when you need them.**
- **Have the knowledge and expertise to properly fit every part we supply.**
